It gives us great pleasure to welcome you to the 65th Annual Scientific Conference of the British Society of Paediatric Dentistry.

Our 2017 logo incorporates a bee which is a nod to our city’s industrious past. Indeed, the bee is also incorporated into Manchester’s coat of arms, our University crest, the floor of our Town Hall and even on our rubbish bins! The honey bee is also a perfect example of a society which works collaboratively to achieve a collective goal, and we hope that this, along with our Conference theme of “Creative Collaboration” describes our day to day working too. Manchester has certainly been a hive of activity as we pulled together to deliver what we hope will be a Conference to remember.

Our aim is to deliver a first class delegate experience - we want you to listen to inspiring speakers, eat well and sleep well. In order to cater for your body as well as your mind, we will have challenged ourselves to deliver an active social programme with a focus on wellbeing. You will have the opportunity to join us for morning runs, Tai Chi and mindfulness sessions, although we won’t hold it against you if you would prefer a lie-in instead.

It has been 20 years since the North-West Branch hosted the BSPD Conference. We are delighted to welcome you back to our wonderful city!

Claire Stevens  
President Elect, BSPD

Siobhan Barry  
Conference Chair

Laura Gartshore

Laura is the new Chair of the BSPD Teacher’s Branch. Her research interests include dental trauma, dental education, and development of the specialty.

Laura has been awarded a Fellowship in Paediatric Dentistry (Royal College of Surgeons of England), Membership of the Faculty of Dental Trainers (Royal College of Surgeons of Edinburgh) and Fellowship of the Higher Education Academy.

As a Clinical Lecturer at the University of Liverpool School of Dentistry, a PhD student, and a Specialist in Paediatric Dentistry, she has been able to source some fantastic, and varied, speakers for this year’s Teacher’s Branch Study Day.

Caroline Kenyon

Caroline is Director of Communications and Engagement at the Innovation Agency; the Academic Health Science Network for the North West Coast.

Caroline joined the NHS in 2011 after roles in journalism, broadcasting and PR – in which she developed a passion for health communications.

Before joining the Innovation Agency she was Associate Director of Communications at The Walton Centre NHS Foundation Trust for four years, where she re-established the communications function and set up a fundraising team. This followed 20 years as a PR consultant, during which time she provided PR and marketing services for numerous NHS organisations; regeneration bodies; and businesses.

She has also delivered media training and crisis PR support for organisations around the country, particularly in the NHS. Her early career was in journalism, working for regional and national press; BBC local radio in Nottingham and Lancashire; Radio 4 magazine programmes; and Border TV. She was also an interim lecturer in broadcast journalism at the University of Central Lancashire.

Caroline holds a Diploma in Professional Marketing with the Chartered Institute of Marketing.
@carokenyon
www.innovationagencync.nhs.uk

Ben Underwood

Ben is an NHS dentist in York. He is the developer of the multi-award winning free Brush DJ app and one of the inaugural NHS Innovation Accelerator fellows.

Dr Patricia Neville

Patricia is a sociologist and Lecturer in Social Sciences at the School of Oral and Dental Sciences, University of Bristol. Since joining the School of Oral and Dental Sciences in January 2014, she has applied her sociological expertise to oral health, developing new research interests in the sociology of oral health and professionalism and dental education.
Professor Kevin O’Brien

Kevin was appointed Professor of Orthodontics at the University of Manchester in 1996. He has previously held posts in the USA and was Dean of Manchester Dental School from 2004 - 2007 and Associate Dean of the Faculty of Medical and Human Sciences from 2007 - 2010. He was Chair of the General Dental Council 2011 - 2013. He is currently the Director of the Manchester Academic Health Science Centre Clinical Trials Unit.

His main research interests are clinical trials of the care of children with severe dentofacial problems. He has published over 90 scientific papers, mostly in the American Journal of Orthodontics. Committed to teaching and research, he has obtained £7m external research funding. He has given the Northcroft Memorial and Ballard Lectures for the British Orthodontic Society and has been awarded the Turpin, Dewel and Jarabak awards by the American Association of Orthodontists.

He currently writes a surprisingly successful orthodontic blog (www.kevinobrienorthoblog.com).

Professor Callum Youngson

Callum qualified from Dundee in 1982 and took House Officer posts in Leeds and Dundee. He worked briefly in practice before returning to Leeds as a lecturer. In Leeds he became the Director of Taught Postgraduate Studies and then Head of Conservative Dentistry. He was appointed as Professor/Head of Unit of Restorative Dentistry at the University of Liverpool in January 2004 and appointed to Head of School in September 2008. He was then appointed subsequently as Head of Institute of Clinical Sciences (Dentistry; Health Sciences & Medicine) in Liverpool in August 2016.

He has been the previous Chair of the Association of Consultants and Specialists in Restorative Dentistry and was Chair of Dental Schools Council from 2014 – 2017.

Clinical interests are mainly fixed prosthodontics and diagnosis of complex oro-facial pain.

Dr Cathy Coelho

Cathy is an Associate Professor/Senior Lecturer in Clinical Dental Education and Year 4 Lead (the penultimate year) at Plymouth University Peninsula School of Dentistry. She is chair of the PUPSMD Faculty Cultural, Diversity and Inclusion Committee and the Module Lead for the Clinical Audit module. She also takes lead responsibility for Enquiry-based learning, Academic Remediation and Widening Participation in the Dental School. She has a Masters in Clinical Dental Education, which investigated patient and students perceptions on giving feedback on the communication skills of dental students and was awarded an Award for Teaching Excellence from The Association for Dental Education in Europe (ADEE) in 2016.

Professor Luke Dawson

Professor Luke Dawson is currently the Director of Undergraduate Education at the University of Liverpool School of Dentistry. He has been a clinical educator since 1996 and has taught undergraduate oral surgery and oral medicine. He was made a National Teaching Fellow in 2012 and in the same year received a Fellowship from the Royal College of Surgeons of England, by election, for services to dental education. His research interest is in how early stage clinicians develop expertise and how this can be enhanced through the development of innovative technology-supported designs for continuous professional development. A by-product of this interest was the development of LiFTUPP, in conjunction with Ben Mason, Colette Balmer and Phil Jimmieson. LiFTUPP is a technology-supported learning design that operationalises the development and measurement of professional competence and is now used by several of the UK dental Schools.

Outside of education, his research interests also include the causes of glandular hypofunction that underlie Sjögren’s Syndrome.

Colette Balmer

Colette qualified in Microbiology and then Dentistry in Leeds. She followed a career in oral surgery and is currently a Consultant/Honorary Senior Clinical Lecturer in Oral Surgery at Liverpool University Dental Hospital. She has a major interest in teaching and training and has developed and delivered lectures and courses for Dental Undergraduates; Dental Care Professionals; GDPs and Dental
Postgraduates including DCTs and StRs. She is one of the four original inventors of “LiFTUPP”.

Her recent national roles have included British Association of Oral Surgeons Council; Advisory Board for Foundation Training in Dentistry; Advisory Board for Specialty Training; The Oral Surgery pathways development group; The Oral Surgery pathways implementation group and the commissioning guides production group. She is an examiner for the MFDS and M.Oral Surgery RCS examinations and the external examiner for the D.Ch.Dent Oral Surgery programme in Dublin. She sits on the SAB in Edinburgh; The Irish Specialty Advisory Board and is currently the Chair of the Oral surgery SAC.

Sarah McKernon
Sarah qualified from the University of Liverpool School of Dentistry in 2011. Following several years as a Senior House Officer and award of Membership to the Royal College of Surgeons of Edinburgh, she returned to the University in 2014 to commence her current role as a Clinical Lecturer and Honorary Specialty Trainee in Oral Surgery. She has since received Fellowship of the Higher Education Academy.

Sarah will present the results of a randomised controlled trial that she conducted in 2016, entitled Non-Technical Skills in Undergraduate Dental Education. This work is the first of its kind in dental education. Non-technical skills are highly relevant to undergraduate and postgraduate dental education and to Paediatric Dentists. Sarah will share her experience of introducing non-technical skills to the curriculum, with some suggestions to take home to your own units during this interactive session. Sarah has presented this work widely, and most recently at the International Association of Dental Research in San Francisco, where it was well received. Sarah’s interest in non-technical skills stems from her interests in patient safety and dental education. She enjoys travel and has recently completed a voluntary placement at a refugee camp in Greece, followed by a 3 month secondment to Australia, Singapore and Cambodia, delivering oral and maxillofacial surgery to diverse populations.

Sarah is Trainee Representative for the British Association of Oral Surgeons (BAOS), Treasurer for the 2017 Conference of the Association of British Academic Oral and Maxillofacial Surgeons (ABAOMS), a board member of the Khmer Foundation for Oral and Maxillofacial Surgery and Liverpool Representative for the British Dental Associations' Central Committee for Dental Academic Services (CCDAS).

She looks forward to meeting some new faces at the study day in the name of Creative Collaboration.

Ayisha Davies-House
Ayisha Davies-House graduated with a Bachelor in Dental Surgery (BDS) from the University of Bristol in 2011. Following several years of dental core training in Oral and Maxillofacial Surgery and Oral Surgery she was awarded Membership of the Joint Dental Faculties by the Royal College of Surgeons of England and undertook a year working in the private dental sector in Perth, Western Australia.

During her time working at Liverpool University Dental Hospital she developed an interest in teaching, completing a Postgraduate Certificate in Dental Education and achieved Fellowship of the Higher Education Academy. She was recently appointed as a Specialty Registrar in Oral Surgery and is a regional representative for the British Association of Oral Surgeons.

Ayisha will be presenting her findings from a pilot study undertaken in 2016 regarding patient preferences for greetings in a healthcare setting and will discuss the generational theory and its impact on student-patient and student-teacher interactions. This research was recently presented at the International Association of Dental Research in San Francisco and has been published in the British Dental Journal where it was highlighted as being an important aspect of building relationships in healthcare.

Matthew Hill
Matthew is Executive Director, Strategy at the General Dental Council.

Matthew's knowledge of regulatory policy has been gained through a number of senior roles across a wide range of fields. These include food safety, alcohol and broadcasting, with Matthew having held director positions in both research and intelligence.

Prior to joining the GDC, Matthew was director of regulatory risk at the Gambling Commission, where he applied learning from major regulatory cases to improve protection for consumers, children and vulnerable adults.

Within the GDC, his role as Director of Strategy includes the development and implementation of strategy, policy and communications.

Kevin O'Brien

Kevin was appointed Professor of Orthodontics at the University of Manchester in 1996. He has previously held posts in the USA and was Dean of Manchester Dental School from 2004 - 2007 and Associate Dean of the Faculty of Medical and Human Sciences from 2007 - 2010. He was Chair of the General Dental Council 2011 - 2013. He is currently the Director of the Manchester Academic Health Science Centre Clinical Trials Unit.

His main research interests are clinical trials of the care of children with severe dentofacial problems. He has published over 90 scientific papers, mostly in the American Journal of Orthodontics. Committed to teaching and research, he has obtained £7m external research funding. He has given the Northcroft Memorial and Ballard Lectures for the British Orthodontic Society and has been awarded the Turpin, Dewel and Jarabak awards by the American Association of Orthodontists.

He currently writes a surprisingly successful orthodontic blog (www.kevinobrienorthoblog.com).

Sondos Albadri

Sondos is a Reader and Honorary Consultant in Paediatric Dentistry at the University of Liverpool. Sondos qualified from Jordan University of Science and Technology in 1997. Moving to the UK in 1998, she completed her PhD at Queens University Belfast and then moved to England for a number of clinical posts before starting her specialists training in Paediatric Dentistry in Manchester. Sondos moved to Liverpool in 2008 to complete her consultant training.

Her research interest lies in investigating attitudes and behaviours in prevention and disease management, Dental Traumatology and Endodontics in young people.

Outside the dental school, she has an active role in the British Society of Paediatric Dentistry as the Honorary Editor and Chair of the Conference Abstract and Prize Committee. She is the Associated Editor of the International Journal of Paediatric Dentistry and a member of the Specialists Advisory Committee.

Yang See Chau

Yang See joined the Liverpool Dental Hospital in 2015 and currently works as a Specialist in Paediatric Dentistry. She graduated from the University of Sheffield in 2006 having obtained her BSc (Honours) in Biomedical Sciences from Manchester. She completed her General Professional Training in Liverpool followed by working as a Senior House Officer in Oral and Maxillofacial Surgery at North Manchester Hospital and at Alder Hey Children’s Hospital. She spent two weeks in Tanzania volunteering with Bridge2Aid.

Yang See completed her specialist training in Paediatric Dentistry at Newcastle Dental Hospital and at County Durham and Darlington Community Dental Services. Yang See is a member of The Royal College of Surgeons of Edinburgh and examiner for the MFDS. She is President Elect for the BSPD Merseyside Branch. Yang See will be starting her post - CCST training in Paediatric Dentistry in the North West in September 2017.

Marie Therese Hosey

Marie Therese is the Head of Department for Paediatric Dentistry at the Kings College Dental Institute based in Kings College Hospital, London.

Graduating in Glasgow in 1985, she was among the few dentists in the United Kingdom with training in administering general anaesthesia. Her Masters thesis focussed on methods of evaluating the efficacy of conscious sedation in children. Professor Hosey completed both her higher specialist training in Paediatric Dentistry and her Doctorate, which studied the effects of liver disease and transplantation on the oral tissues, in Birmingham, England. She moved to Glasgow in 1998 where she was appointed as Senior Lecturer and later as Reader in Paediatric Dentistry.

She is a Fellow of the Royal Collage of Surgeons of Glasgow and an examiner for the Intercollegiate Fellowship Speciality Examination in Paediatric Dentistry. She wrote the RCS (Eng) clinical guideline on paediatric conscious sedation, and is a past council member of the Association of Dental Anaesthetists and the Dental Sedation Teachers Group. She has co-authored
Mechelle Collard

Mechelle qualified from Cardiff University as a dentist in 1993. Following vocational training and SHO posts in maxillofacial surgery, orthodontics, special care dentistry and paediatric dentistry, she returned to Wales to carry out specialist training in paediatric dentistry at University Dental Hospital, Cardiff.

Mechelle gained an MPhil in 2001 and an intercollegiate fellowship in paediatric dentistry in 2003. Following a locum consultant post at the Eastman Dental Institute, London she was appointed as a Consultant in Paediatric Dentistry in South Wales.

She is committed to postgraduate training and very involved in dental core training; as Training Programme Director for the Cardiff DCT programme, an educational supervisor and an examiner for DCT 2 and DCT 3 at national recruitment. She is also Training Programme Director for paediatric dentistry specialist training in Wales and an examiner for the membership examinations in paediatric dentistry.

Mechelle's time is split between the South Wales cleft team and the Dental Hospital, Cardiff. She is the lead paediatric dentist for the cleft team in Wales. The team have prioritised dental health for cleft children and taken a targeted, individualised preventive approach and have seen dental health improve. She is currently the chair of the paediatric dentistry clinical excellence network and is actively involved in collecting dental health data for cleft children. This data is submitted to the CRANE database at the Royal College of Surgeons, England. In 2020 Mechelle will be President of the Craniofacial Society of Great Britain.

Mechelle is a member of BSPD and spent several years as secretary and chairperson of her local branch.

Jackie Smallridge

Jackie qualified from Bristol Dental School in 1983, doing specialist training in Paediatric Dentistry at the Eastman Dental Hospital, Great Ormond Street and The Royal London Dental School. Her interest in dental care for children with clefts started whilst at Great Ormond Street. At this time, the first studies looking at Cleft care differences across Europe were taking place and Mike Mars work in Sri Lanka was showing that unrepaired clefts allowed normal growth. Both studies proved to be very influential in the development of Cleft care in the UK. At this time she joined The Craniofacial Society of Great Britain and Ireland (CFSGBi). During her time working at Guy's and St Thomas' Hospitals in London she developed the Paediatric Dental Service for the South Thames Cleft Service and since 2014 Jackie has been developing a similar service for the East of England Cleft Network based at Addenbrookes Hospital Cambridge. Victoria Clark and Jackie started the Special Interest Group, now Clinical Excellence Network for Paediatric Dentistry as part of CFSGBi and Jackie was fortunate to be the President of CFSGBi 2014/2015. She has been involved with the CRANE National Database for Cleft and a member of the Clinical Reference Group and Cleft Development Group, which developed the National Service Specification for Cleft Care. Jackie has taken part in the National Cleft Care UK study which has analysed how the centralisation of cleft care in the UK has influenced outcomes and worked to ensure all paediatric dentist collecting data from children across UK centres are suitably calibrated. Throughout this time she has also been working in Specialist practice in Ipswich.

Victoria Clark

Victoria qualified as a dentist at Leeds University in December 1989. After graduating she worked as an SHO at Alderhey Childrens Hospital and Great Ormond Street then went on to complete a 2 year masters programme in Paediatric Dentistry at Leeds University between 1994 to 1996. During this period she joined the Ridings Branch of British Society of Paediatric Dentistry (BSPD). She carried out specialist training at Birmingham Dental and Children’s Hospital gaining an Intercollegiate Fellowship in Paediatric Dentistry at the Royal College of Surgeons of Edinburgh in 2001. Victoria was then appointed part time consultant in Paediatric Dentistry at Birmingham Children’s Hospital. This post is predominately working with the West Midlands Cleft Team caring for children with cleft lip and palate. She was involved in setting up the Special Interest Group in Cleft Paediatric Dentistry and was the first chair of this group. Victoria is actively involved in collecting dental health data for cleft children which is submitted annually to CRANE and quality dashboard. She was also involved in collecting the dental data for the CCLUK study in 2013. At BCH she also works with the Epidermolysis Bullosa, Metabolic
disorders and Haemophilia teams providing care for these special patients. Victoria’s interest in these patients has involved in audit, clinical guidelines and presentations at National and International Conferences.

Victoria is an active committee member of the West Midlands branch of BSPD and attends the National Annual Conferences. She was president of the Branch in 2000 and appointed President of the Society in September 2009. She is committed to training paediatric dentists of the future and was Training Programme Director for Paediatric Dentistry in the West Midlands (2005 – 2015) as well as a trainer for trainees in paediatric dentistry at Birmingham Children's Hospital. Victoria was the first chair of National Recruitment in Paediatric Dentistry which was set up in 2013. She has been a member of the Paediatric Dentistry Advisory Board for the Royal College of Surgeons of Edinburgh and an examiner for the M.Paed. Dent. and ISFE Examinations. She was appointed chair of the National recruitment in Paediatric Dentistry in 2013 and the Chair of SAC in Paediatric Dentistry in 2015.

Joanna May
Joanna is a Consultant in Paediatric Dentistry working with both the North West North Wales Cleft Network and in the Dental Health Unit at Royal Manchester Children's Hospital. She completed her specialist training in Birmingham and was a senior registrar at Royal Children's Hospital Melbourne for 7 months in 2013-2014. Prior to specialist training she working in Warwickshire Special Care Dental Service and as a clinical assistant on the cleft lip and palate clinic at Birmingham Children's Hospital. She has particular interests in alternatives to GA for children, the management of medically compromised children, cleft lip and palate and pulp treatments for primary teeth.

Zulf Mughal
Professor Zulf Mughal graduated in medicine from the University of Liverpool, UK, in 1978. He received postgraduate training in Paediatrics at hospitals in Manchester, Liverpool, in the UK and in Cincinnati, USA. He was appointed a Consultant Pediatrician in 1988. He is currently employed as a Consultant in Paediatric Bone Disorders at the Royal Manchester Children's Hospital. In 2013, he was appointed Honorary Clinical Professor in Child Health at the University of Manchester. He has extensive experience in management of childhood bone & mineral disorders. Professor Mughal has published >150 peer reviewed scientific papers, invited reviews and book chapters. In June 2015, he was awarded the prestigious Charles Slemenda Award for his outstanding contribution to Paediatric Bone Research.

Simon Jones
Simon Jones is a Consultant in Paediatric Inherited Metabolic Diseases at the Willink Unit at St Mary's Hospital in Manchester.

His major research interest is therapy for lysosomal storage diseases (LSDs).

He received his medical training at the Edinburgh University Medical School, with a BSc in Neurosciences. He moved to London and trained in Paediatrics at Guy’s and St. Thomas’ Hospital, London. He has been working at the Willink Biochemical Genetics Unit in Manchester since September 2005.

Since 2008, he has been a Consultant in Paediatric Inherited Metabolic Diseases at the Willink Unit and is now the clinical lead for the LSD service. The Willink Unit is now part of the Manchester Centre for Genomic Medicine at St Mary’s Hospital.

Simon has been actively involved in many phase I-IV international multicentre trials of novel therapies for LSDs. He is currently the principal investigator in a number of LSD trials and a senior lecturer at the University of Manchester. He is an author of over 100 peer-reviewed papers and 4 book chapters. When not working, he watches Liverpool Football club and spends time with his family.

Stephen Hughes
Stephen qualified in Edinburgh in 1994, followed by postgraduate training in London, Lusaka, Zambia and Newcastle. He completed his PhD in Immunology of Severe Malnutrition in 2010.

Joanne Taylor
Head of Marketing and Fundraising, Climb (Children Living with Inherited Metabolic Disorders)
Sarah Vince-Cain

Sarah Vince-Cain is a registered dietitian and is employed by Central Manchester University Hospitals NHS Foundation Trust. Since 2015 she has been the Clinical Programme Manager for the Reducing Childhood Obesity in Manchester Programme.

In order to understand how today’s children are growing, Manchester has extended its child measuring programme beyond the remit of the National Child Measurement Programme (NCMP) and is now offering visual and digital feedback to parents of all primary aged children. A growth chart is produced electronically for every child who attends a Manchester primary school.

A child’s growth pattern is a fundamental indicator of health and wellbeing and parents are universally interested in their child’s development. Manchester has launched an innovative on-line parental feedback portal CHAMP (Children’s Health and Monitoring Programme) https://www.champ.cmft.nhs.uk/ where parents are invited to register with the on-line system and to view their child’s results every year.

The response from parents, schools and health professionals has been very positive and there is evidence that localised feedback is driving local change.

The University of Manchester are key programme partners and a team of researchers are producing a quantitative analysis and qualitative evaluation of CHAMP.

Ingrid Perry

Ingrid has over 32 years’ experience within the dental profession and currently works for {my}dentist as a Practice Manager in Bridlington. During her career she gained national recognition, winning the Patron’s Prize for Innovation in 2012 from the NOHPG and locally came runner up in the Hull Women in Business, Women of Achievement Awards in both 2012 & 2014. Ingrid was also a finalist in the Dental Awards for Oral Health Promoter of the Year in 2013.

For many years Ingrid worked closely with local schools and was co-founder of the nationally recognised Teeth Team programme which won “Best Child Dental Health Initiative” in the DH&T Awards in 2014. Teeth Team is now registered as a charity and Ingrid is the charity’s Secretary and sits on its’ Board of Trustees.

Margie Taylor

Margie was appointed Chief Dental Officer for Scotland in May 2007 having held posts previously in three health boards in the central belt of Scotland.

Born in Edinburgh, Margie graduated in dentistry in 1978 from Edinburgh University where she later returned to study Community Medicine. In 1996, she completed a MBA from Heriot-Watt University. She is a Fellow in dental surgery of the Royal College of Surgeons of Edinburgh and the Royal College of Physicians and Surgeons of Glasgow; and a Fellow of the Faculty of Public Health and the Faculty of General Dental Practice (UK).

Colette Bridgman

Colette is Chief Dental Officer (CDO) in Wales. Originally from Belfast, Colette qualified in Manchester in 1983. She has clinical experience in hospital services, general dental practice and the community dental service.

She was the strategic dental lead Consultant in Dental Public Health, within Greater Manchester’s devolved Health and Social Care Partnership. She has also worked within the office of the Chief Dental Officer in England, working on a number of high profile strategies. She has served as President of the British Association of the Study of Community Dentistry.

Sara Hurley

Sara Hurley was appointed as CDO England in July 2015. Having qualified from the University of Bristol Dental School 1988 she served as a clinical dentist with the Army and latterly as the Commanding Officer/Chief Executive of the Royal Centre for Defence Medicine (RCDM). Her career portfolio spans across the domains of clinical delivery, dental public health, wider healthcare policy and commissioning.

As Chief Dental Officer England she holds responsibility for clinical policy and is professional adviser for oral health and dental care to Department of Health, NHS England and Health Education England. Her current focus is the development of an integrated oral health and dental care strategy.
Richard Valle Jones

Richard qualified from Bart’s and the London in 1999, then spent four years in practice in London, completing vocational training and general professional training whilst also working in restorative dentistry in Bedfordshire and then in a MFDS training post in Nottingham. This was followed by various oral and maxillofacial roles. Since then Richard has worked in several community dental services focusing on special care dentistry. In 2010 Richard became a specialist and went on to complete a Master of Clinical Dentistry in Fixed and Removable Prosthodontics at King’s College London.

Currently Richard is the Clinical Director for Dentistry at Pennine Care NHS Foundation Trust, which provides a wide range of dental care services. He is also studying part time, for a Masters in healthcare leadership, through the NHS leadership academy and Universities of Birmingham and Manchester.

Richard is currently a Director of Open Odonto, a Community Interest Company, involved in open source dental software technology.

Richard has held various educational roles including vocational training, examinerships, teaching and assessing on post graduate programmes at Kings College London. He has been an Education and Development Board member at the Royal College of Physicians and Surgeons of Glasgow.

Richard is an external adviser for the Health and Parliamentary Ombudsman.

Rachel Isba

Rachel graduated from Oxford Medical School in 2003 and then moved back to the North West, where she completed her house jobs before entering paediatric training. In 2009 she received her PhD in medical education from the University of Manchester and in 2010 left full-time paediatrics to undertake training in public health, but continuing to see paediatric patients in the Emergency Department at North Manchester General. On completion of her postgraduate training scheme in 2015, she took up a post as clinically-active Consultant in Paediatric Public Health Medicine, at North Manchester General Hospital, part of The Pennine Acute Hospitals NHS Trust. In 2017 Rachel became Head of Lancaster Medical School and continues her work in the NHS, imbedding public health in the Emergency Department, and with a particular focus on dental health and vaccination for children. She also has honorary appointments at the Liverpool School of Tropical Medicine and the University of California.

Nicola Innes

Nicola Innes is Professor of Paediatric Dentistry at Dundee University Dental School and teaching lead for Paediatric Dentistry and Evidence Based Practice.

Nicola initially qualified as a Registered General Nurse, completed a BSc in Life Sciences then graduated with a BDS(hons) and First Class Honours intercalated degree in Cellular and Molecular Pathology. She spent seven years as a General Dental Practitioner and completed a PhD based on a randomised control trial in general practice investigating the Hall Technique, a novel method of managing dental caries in primary molar teeth.

Nicola sits on several guidance development groups (SIGN and SDCEP), the Scottish Dental Practice Based Research Network steering committee, and was part of the European Cariology Curriculum Development Group.

Nicola’s research interests are broadly around improving patient care and outcomes in paediatric dentistry and caries management. She has published widely in these areas and is Co-Principal Investigator on two large multi-centre clinical trials: FICTION (Filling Children’s Teeth Indicated or Not) (www.fictiontrial.org), a UK-wide primary care dental trial comparing 3 caries management strategies for children; and BRIGHT (Brushing Reminder 4 Good oral Health) looking at whether a school-based lesson followed by reminder text messages reduces dental caries in young people living in deprived areas. She also participates in Germany, Australia, Brazil, US and New Zealand based trials.
POSTER SESSIONS

POSTER (NON-PRIZE CATEGORY)

P1 Premolar Transplantation: Unfavorable outcome or not!
A. Adams & S. Albadri
Liverpool Dental Hospital, LUDH, Liverpool, UK

P2 Cystic Bony Lesion in a Down Syndrome Patient-an MDT approach
M. Agel1, H.L. Sanders2 & A. Dickenson1
1King’s College Hospital NHS Foundation Trust, UK
2Derbyshire Community Health Service NHS Foundation Trust, UK

P3 Referral Pathway from the Paediatric Dentistry Department to the Eastman Education Centre: Second Cycle Audit
A.J. Ahmad & I. Holroyd
Eastman Dental Hospital, UCLH, London, UK

P4 Compliance to Guidance for Cone Beam CT [CBCT] Examination in Paediatric Dentistry
M. Al-Chihabi1, V. Srinivasan1 & K. Horner2
1University Dental Hospital Manchester, UK
2University of Manchester, UK

P6 Did-Not-Attend Appointments in a Dubai postgraduate paediatric dentistry setting: An Audit.
W. Al Ayyan, M. Halabi, M. Kowash & I. Hussein
Hamdan Bin Mohammed College of Dental Medicine (HMBCDM), Mohammed Bin Rashid University of Medicine and Health Sciences (MBRU), Dubai, United Arab Emirates (UAE)

P7 Assessment of knowledge of UAE dentists of child maltreatment, protection and safeguarding
H. Alhajeri, M. Halabi, M. Kowash & I. Hussein
Hamdan Bin Mohammed College of Dental Medicine, MBRU, Dubai, UAE

P8 Evaluation of Adolescent Propofol Intravenous Sedation Service in Manchester Dental Hospital
E. Alakkari, C. Gardener & S. Barry
1Child Dental Health Department, University Dental Hospital of Manchester, Manchester, UK
2The Department of Paediatric Dentistry, Leeds Dental Institute, Leeds, UK

P9 An Audit of Periodontal Assessment in children and adolescents
W. Almutairi1, A. Banihani1 & A. Hollis2
1Department of Paediatric Dentistry, Leeds Dental Institute, University of Leeds, UK
2Department of Child Dental Health, University Hospitals Bristol NHS Foundation Trust, UK

P10 Audit to assess documentation of caries risk and prevention on consultation clinics
A. A. Alohal, S. Sood & J. C. Mitchell
Department of Paediatric Dentistry, King’s College Dental Institute, King’s College Hospital (KCH), London, UK

P11 Audit on assessing outcomes of a Paediatric Dental A&E service
N. Alrubaian, M. Ivanova, S. Sood & J. Mitchell
Department of Paediatric Dentistry, King’s College Dental Institute, King’s College Hospital (KCH), London, UK

P12 Dental management of a patient with Simplex Epidermolysis Bullosa under general anaesthesia
T. W. Alwuhaib1, P. Kandiah2 & H. Nazzali1
1Leeds Dental Institute, University of Leeds, UK
2Manchester Dental Hospital, UK

P13 An unusual case of giant cell granuloma
Eastman Dental Hospital, UCLH, London, UK

P14 An audit of information provided with Internal General Anaesthetic referrals
D.E. Bailey, J. E. Brodison & J. Pitt
Solent NHS Trust, Hampshire, UK

P15 Treatment outcomes of using inhalation sedation for comprehensive dental care
A. Banihani, M. Madouh & J. F. Tahmassebi
School of Dentistry, University of Leeds, UK

P16 Keeping it Current: An Updated Method of Medical History Recording
F. Barrow1 & G. D. Taylor2
1Department of Oral & Maxillofacial Surgery, Royal Cornwall Hospital, UK
2Children’s Dental Health Department, Newcastle Dental Hospital, UK

P17 Audit: Management of facial injuries sustained by dog bites in paediatric patients
S. Baughan S & A. Dickenson
Royal Derby Hospital, UK
P18 Hall versus conventional crowns: A retrospective study in a UAE postgraduate setting
H. Binladen, M. Halabi, M. Kowash, A. H. Khamsi & I. Hussein
Hamdan Bin Mohammed College of Dental Medicine (HBMCDM), Mohammed Bin Rashid University of Medicine and Health Sciences (MBRU), Dubai, United Arab Emirates (UAE)

P19 Appropriate screening of periodontal disease in paediatric patients
L. E. Bird1, G.D. Taylor2 & L. A. L. Burbridge3
1Newcastle upon Tyne Hospitals NHS Foundation Trust, UK
2Department of Child Dental Health, Newcastle upon Tyne Hospitals NHS Foundation Trust, UK

P20 The sequel of primary trauma: management of the permanent dentition
L. Bowyer1, C. Harrison1 & S. Barry1,2
1University Dental Hospital Manchester, UK
2University of Manchester, UK

P21 Success of conventional glass-ionomer cement in class II cavities in deciduous molars
K.G. Butt
University Dental Hospital, Heath Park, Cardiff, UK

P22 Management of a boy with chronological hypoplasia and vitamin D deficiency
S. L. Carr1, C. Harrison1 & S. Barry1,2
1University Dental Hospital Manchester, UK
2University of Manchester, UK

P23 Success of surgical exposures of impacted canines – a retrospective audit
Eastman Dental Hospital, UCLH, London, UK

P24 The use of CBCT to aid management of dental trauma
L. Clarke & P. Kandiah
University Dental Hospital Manchester, Manchester, UK

P26 Dental service evaluation carried out on medical general anaesthetic lists
L. Dakkouri, G. Abou-Arneira, S. Parekh & C. Mason
Dental and Maxillofacial Department, Great Ormond Street Hospital, London, UK

P27 Re-audit on Basic Periodontal Examination (BPE) documentation for paediatric patients
S. Desai & C. Deery
Charles Clifford Dental Hospital, Sheffield, UK

P28 Theatre Time Usage in Paediatric Dental Extractions Under General Anaesthesia
L. Duffy1 & R. Bannister2
1Dental Core Trainee Year 3, Charles Clifford Dental Hospital, Sheffield, UK
2Specialist in Paediatric Dentistry, Kingswood Dental Clinic, Harrogate, UK

P29 An Audit of the Management of Poor Prognosis First Molars in Children
K. Durman1, A. A. Gallacher1, D. Waring1 & S. Barry1,2
1University Dental Hospital Manchester, UK
2University of Manchester, UK

P30 Antimicrobial activity of berberine against cariogenic and opportunistic oral microorganisms
A. Dziedzic1, R. D. Wojtyczka2 & R. Kubina3
1Department of Conservative Dentistry with Endodontics, Medical University of Silesia, Katowice, Poland
2Department and Institute of Microbiology and Virology, School of Pharmacy with the Division of Laboratory Medicine in Sosnowiec, Medical University of Silesia, Katowice, Poland
3Department of Pathology, School of Pharmacy with the Division of Laboratory Medicine in Sosnowiec, Medical University of Silesia, Katowice, Poland

P31 The consequences of self-injurious behaviour in the developing dentition: a case series
L. Ewbank, R. Rizvi & R. J. Spencer
Pinderfields General Hospital, West Yorkshire, UK

P32 The Dental Experience of Children with X-Linked Hypophosphataemia (XLH): A Service Evaluation
C. M. Feeney1, K. Durman1,2, A. Field1, C.A. Hood1 & S. A. Sukthankar4
1Dental Health Unit, Royal Manchester Children's Hospital, UK
2University Dental Hospital of Manchester, UK
3University of Manchester Medical School, UK
4Department of Paediatric Medicine, Royal Manchester Children's Hospital, UK

P33 Audit of Paediatric Antibiotic Prescriptions in North east London Community Dentistry
D. Gillway
North East London Community Dental Service, London, UK

P34 Tackling the grey area – adherence to bleaching protocols at Birmingham Dental Hospital
T. Gohil, A. Casaus, D. Sisson & C. J. Brown
Children’s Department, Birmingham Dental Hospital, Birmingham, UK

P35 Early Presentation of Oral Submucous Fibrosis in Adolescence
E. O. Goodrum & A. R. Johnson
Eastman Dental Hospital, UCLH, London, UK

P36 New oropharyngeal screening service for Fanconi Anaemia patients at Birmingham Children's Hospital
S. Hackett & V. J. Clark
Birmingham Children's Hospital, Birmingham, UK

P37 Audit of paediatric patients who miss appointments in a Community Dental Service
S. I. Hafeez
Community Dental Service, County Durham and Darlington NHS Foundation Trust, County Durham and Darlington, UK
P38 Delivery of oral-health advice for children in general dental practice
Health Education England, Yorkshire and Humber, Leeds Dental Institute, UK

P39 Oral Health in Children with Cystic Fibrosis
M. Hamed & M. Collard
University Hospital for Wales, Paediatric Dentistry, Cardiff, UK

R. Yee1, P. L. Chay1, H. L. Chia2
1Dental Services, KK Women's and Children's Hospital, Singapore
2Plastics and Reconstructive Services, KK Women's and Children's Hospital, Singapore
Kinder Krowns is a leading manufacturer of esthetic pediatric crown, offering both Pre-veneered and All-Ceramic Zirconia Pediatric Crowns. Just as in adult dentistry, the demand for cosmetic services and esthetic restorations in pediatric dentistry is increasing annually. To answer this demand, more and more dentists are turning to zirconia as their material of choice. Zirconia Kinder Krows offer esthetics, durability and biocompatibility that no other material on the market can offer. By incorporating Zirconia Kinder Krowns into your practice, you can confidently offer an esthetic restoration that will not only provide unrivaled esthetics, but will also hold up until the deciduous tooth exfoliates.

Experience the unique advantages only offered by Zirconia Kinder Krowns:

Save money, without sacrificing quality. Kinder Krowns are the most competitively priced zirconia pediatric crowns made in the USA.

Simplicity. No try-in crowns or special cement. Our Internal retention threads provide mechanical retention and allow you to use glass ionomer cement and the actual crown for intraoral try-ins. This saves you valuable inventory and chairside time.

Universal Anteriors help your bottom line. Incorporating universal anteriors into your practice cuts your inventory in half (Centrals & Laterals vs D, E, F, G). However, if you prefer lefts and rights, they are also available.

Less reduction and less chairside time. Our new Less Prep design requires less reduction and time to place Zirconia Kinder Krown than ever before.

A more natural-looking smile. By glazing and polishing Zirconia Kinder Krowns, they blend in with your patient's natural dentition - rather than reflect like 100% polished crowns.

In recognition for our superior quality systems, we have been awarded ISO 13485 certification, CE certification, Health Canada License and Certified Dental Laboratory certification. You can trust us to provide you with consistent, easy to use, beautiful restorations every time.

Myofunctional Research Co.
More than 75% of children develop a malocclusion, which is evident from as early as 5 years of age.

The global demand for orthodontics without braces continues to grow. It’s an option that many parents and patients would prefer. The Myobrace System is based on over 27 years of experience in correcting orthodontic problems without the need for braces.

Myofunctional Research Co. (MRC) has recognised breathing disorders as one of the major causes of malocclusion, poor jaw growth and TMJ disorder. By effectively changing the way orthodontics for children is performed, it satisfies the demand from parents for a less invasive way to straighten teeth without braces at an early age.

The Myobrace System is used worldwide, and MRC trains doctors in over a 100 countries. MRC can help you get started in treating young. Please contact us to help you start treating the cause of malocclusion at 00800 6962 7223.

GOLD SPONSORS

Alexion

Alexion is a global biopharmaceutical company focused on developing and delivering life-transforming therapies for patients with devastating and rare diseases. Patients with these life-threatening diseases often have no effective treatment options, and they and their families suffer with little hope. Our goal is to deliver medical breakthroughs where none currently exist. We are driven because we know people's lives depend on our work.

Babycup Ltd

Healthy sipping comes easily with Babycup First Cups, the mini open weaning cups designed with babies and young children in mind and endorsed by health professionals around the world. Small enough for little hands to hold and fitting perfectly to a baby's mouth, Babycup First Cups encourage true sipping, supporting oral health whilst also developing fine motor skills and coordination during critical development stages.

Made in Britain, high quality, BPA-free, no spouts, seals or bucket-like proportions, Babycup First Cups are recommended by dentists and orthodontists and used in oral health programmes.

Diminutive in stature and big on results, parents around the world rave about the usability, quality and aesthetic styling of these multi-award-winning cups.

Also suitable for cup-feeding infants in times of feeding challenges such as tongue tie, cleft, latch difficulties and bottle refusal, and with consistently excellent reviews, Babycup First Cups are a weaning and feeding must-have and make an easy addition to any oral health initiative.

SILVER SPONSORS

Bickiepegs Healthcare

Specialists in the oral care of infants 3m+ and home to Bickiepegs Natural Teething Biscuits and Doidy Cup, the uniquely slanted weaning cup.

Both brands have strong heritage of 70yrs+ remaining iconic favourites and enjoy long standing Health Professional endorsement. The Doidy Cup was specifically designed to make weaning from breast/bottle feeding to open cup easier, it is well known for its benefits encouraging good oral health practice, overcoming issues caused by prolonged use of a bottle or spouted cups including tooth decay, delayed speech development and poor chewing skills. Bickiepegs are natural teething biscuits shaped to access front & back of baby's mouth, aiding jaw development and stimulating hidden teeth for straight growth and spacing. We are proud that both Bickiepegs and Doidy are produced in the United Kingdom. Come and see our NEW Finger Toothbrush & Gum Massager launching at the Conference!

**Shofu UK**  
SHOFU is dedicated to providing innovative, high quality products for the entire Dental Team - for Clinicians and Technicians.  

Prophylaxis is especially an important issue in paediatric dentistry.  

Driven by modern concepts of Minimally Invasive Cosmetic Dentistry, SHOFU offers a faster, easier, and gentler sealant system – BeautiSealant – with a self-etching primer that eliminates the need for phosphoric acid etch and rinse steps entirely.  

The flowable composite material Beautifil F10 is also suitable for fissure sealing due to its user friendly viscosity that provides tight and bubble-free restorations.  

Both materials are made of unique Surface Pre-Reacted Glass (S-PRG) filler particles which have been shown to assist in the remineralisation process and support a caries protective effect. For subsequent polishing of the sealed enamel, OneGloss instruments are particularly suitable. The polishers are made of highly concentrated aluminium oxide with silicone as binder and are gentle on tooth structure.

**RA Medical**  
RA Medical is delighted to once again support the BSPD and the Clinical Case Prize. Our helpful and friendly staff will be on hand during the Conference to meet old friends and advise on any aspect of Inhalation Sedation equipment, hosting a small, but comprehensive display of available equipment.
Since we invented the pediatric Zirconia crown nearly a decade ago, we've continued to find better ways to apply tech to teeth. From our patented crown retention design that increases mechanical adhesion to the unique lateral shape of our crowns that speeds up seating, our products make sure our kids never have to settle for anything less than innovative.

From our headquarters in California, we're always working on new products, new educational programs and more environmentally-friendly methods of manufacturing. Through this combination of innovation and education, we're providing dental professionals with the technologies and techniques they need to grow their practices and deliver better care to the most important patients.

Sadly we are unable to attend the exhibition, so please view the links below for more information.

GENERAL INFORMATION

Registration
Registration will be located outside Quays Foyer. Opening times as follows:

**Tuesday 19th September (Teachers Day)**
0900 – 1700 hours

**Wednesday 20th September**
0830 – 1730 hours

**Thursday 21st September**
0830 – 1730 hours

**Friday 22nd September**
0830 – 1530 hours

Catering
Refreshments and lunches will be served outside the Hexagon Room on Tuesday and in Quays Bar from Wednesday to Friday.

Delegate Badges
For security purposes, badges must be worn at all times.

Wifi Access
Wifi will be available throughout the venue. Login instructions will be available from the registration desk.

Phones and devices
As a courtesy to speakers and other attendees, phones and devices should be put on silent mode before entering sessions.

Exhibition
The exhibition will be located in the Quays Bar.

The exhibition will open on the following:
**Wednesday 20th September**
0930-1730 hours

**Thursday 21st September**
0830-1600 hours

Posters
Poster sessions will be held on Wednesday and Thursday. Details of the posters displayed each day can be found in the poster list.

Velcro to mount the posters will be provided on the boards. Additional pieces of Velcro can be obtained from the registration desk. Posters should be mounted and removed by the presenters themselves. At the end of each day, any posters not removed by presenters will be taken down and disposed of.

Car Parking at The Lowry
Parking is provided via the Lowry Outlet Mall multi-story car park which houses over 1000+ spaces, including accessible parking bays.

Rates
Parking is chargeable at £1 per hour per vehicle. Discounted conference parking vouchers are available from the venue for BSPD 2017 delegates. The voucher is £7 per vehicle for full day parking (excludes overnight parking).

Social Programme
Tickets for social events will be issued with badges at registration. If you have any queries regarding social events, please speak to the staff at the registration desk.

Please find the venue details below.

**Angel of North Quiz** – On the 7th (located within The Landing), Blue Tower, MediaCityUK, Salford, M50 2ST

**Conference Dinner** – Imperial War Museum North
The Quays, Trafford Wharf Road, Manchester M17 1TZ

Speakers
Speakers should visit the room that they are presenting in, preferably at least one hour prior to the start of their session, to organise the material for their presentation. Staff at the registration desks will be available to assist with directions.

Cloakroom
Luggage and coats can be left in the cloakroom which is open as follows:

**Wednesday and Thursday:** 0800 – 1730 hours

**Friday:** 0800 – 1530 hours
Annual Scientific Meeting
11th – 14th September
